

CONSTRUCTION UPDATE

2015 Dakota County Overlays

May 20, 2015

Thank you for your patience while we make improvements to the surface of the roadway.

WHAT'S BEING DONE?

Dakota County will rehabilitate approximately 21 miles of pavement as part of the overlay contract this construction season. The end product will be a better looking, longer lasting and smoother roadway.

However, more than just pavement will be rehabilitated this season. Other work will include miscellaneous concrete work and minor utility adjustments and improvements.

A map is attached on the backside of this update showing the construction locations.

WHEN WILL WORK TAKE PLACE?

Work on County Road 8 from Highway 52 to County Road 14 in South St. Paul is scheduled to begin late this week with minor utility adjustments and concrete work. This work will take approximately two weeks to complete. The City has a separate contract for utility work already under way.

Milling, paving, and striping the roadway is tentatively scheduled to occur the week of June 21. This work will take about one week to complete.

WHAT SHOULD I EXPECT?

Work will include milling the existing pavement, paving, replacing curb and gutter, installing pedestrian ramps, and minor utility adjustments. Areas disturbed by construction activities will be restored after the other work is complete. The road will remain open to local traffic and you will have access to your property throughout construction. However, delays are expected. For the safety of both the residents and the workers, please be patient.

WHAT IF I HAVE A SPRINKLER SYSTEM?

Dakota County will not be responsible for damage to your irrigation system within County right-of-way. If you are concerned that your sprinkler system may be impacted, please contact Ross Beckwith at 952-891-7926 prior to May 26 with your name, address of the affected property, and a telephone number that you may be reached during business hours.
