

Dumpsters/Storage PODs placed on City Streets

Dumpsters or PODs placed in the yard or driveway do not require a permit, however, MnDOT imposes seasonal load restrictions on roadways based on how the weather is affecting our roadway strength. Fines could be imposed for violations of these restrictions.

If a dumpster/POD has been approved to be placed on the City street when there are no seasonal load restrictions, the following must be met:

- A dumpster/POD permit is required. The fee for the permit is \$20.00.
- No dumpster/POD shall be wider than eight (8) feet.
- No dumpster/POD shall be located within the travel or thru lane of a street.
- No dumpster/POD shall obstruct any public sidewalk or City right-of-way.
- No dumpster/POD can be placed within thirty (30) feet of an intersection.
- Flashers or reflective tape are required *prior* to placement.
- Wood planking or plywood is required to be placed under the wheels or 'feet' of the dumpster/POD.
- A dumpster cannot remain on the street or alley longer than seven (7) days (unless otherwise approved).
- A storage POD is allowed to be on the street for 14 days and only (2) times per year.
- Any damage to the street, curb or sidewalk as a result of the dumpster/POD is the responsibility of the contractor or homeowner to repair immediately.

Prior to placing a dumpster/POD in the street you must have in your possession the permit card which is to be secured to the dumpster/POD so it can be viewed from the street.

No dumpster/POD may be placed in the street without the required permit card.
