| FENCE (\$50.00) |
|------------------------|

I, the Applicant for this permit, understand that I am responsible for locating the property lines at the above listed property prior to installing any fencing. I plan to locate the property lines by doing the following:

Locating my property corner markers Hiring a licensed surveyor to locate my property corner markers

Obtaining a notarized letter from my neighbor(s) agreeing to the location of the common property line(s) and waiving the survey requirement. If this option is selected, all letters must be submitted along with the fence permit application. If the fence will butt up to a public street or alley right-of-way or if the City owns the neighboring property, the City will not waive the survey requirement.

Maximum Lot Coverage:

Lots that are <5000 sq. ft.: 35%

Lots that are >5000 sq. ft.: 30%

How to Find your Property Markers

An existing fence or structure cannot be used to verify property lines

Property markers, or boundary monuments, are metal pins placed at every corner of the property, including any angle or change of direction of the boundary line. Each pin is shown on the survey of each property. Property markers are required to verify property lines when obtaining permits for certain projects such as fences, sheds, and additions when construction is close to required setbacks or the line itself. Knowing where the property markers are can also avoid legal and neighborhood disputes. Property lines, or boundary lines, are the defined points where one person's land ends and the neighboring land begins.

Step 1

Call Gopher State One at 651-454-0002 to locate utilities to ensure you can dig for the markers safely. They will need a 48 hour notice. This is a free service.

Step 2

Obtain your lot size on the Dakota County website at www.co.dakota.mn.us. Go to "Home and Property" and click on "Online Property Records". Then look for the link to "Go to Property Information Search". Type in your address and you will see the dimensions of your lot on a map.

Step 3

Working from your lot dimensions, use a metal detector to locate the metal pins in the corners of your property. Markers are typically 6-10 inches below the surface and may have a colored cap with numbers on the top. Property markers are generally 30 feet from the center line of the street and 4 feet from the edge of your alley.

Step 4

Put a marker of some type on the uncovered pin. This will need to remain visible until an inspection is done. Do not remove your property pins.

If you are unable to find your markers, and/or need to have any property markers installed, contact a licensed Professional Land Surveyor.
